

Doç. Dr. SERTAN YEŞİL

Dr. Sertan Yeşil received his Ph.D. degree from Middle East Technical University in 2010. He worked as a research assistant in Middle East Technical University and Kocaeli University from 2004 to 2013. He then worked as a process engineer in Roketsan Inc. for one year. Since 2014, he is working as an expert in the Nuclear Safety Department of Turkish Atomic Energy Authority (TAEK). He is taking part in the licensing activities of Akkuyu Nuclear Power Plant and TR-2 Research Reactor. He is also participating in the preparation of the national radiation emergency plan and related exercise documents of this plan. His studies are mainly focused on radiation protection and emergency preparedness and response in the nuclear facilities. Dr. Sertan Yeşil is a member of Emergency Preparedness and Response Standards Committee (EPRéSC) of International Atomic Energy Agency.

Presentation Title: Protection Strategy, Environmental Radiological Monitoring and Use of Operational Intervention Levels during Emergencies in Nuclear Power Plants
